Introduction to Generative AI for Developers

Course Introduction

Logistics

- The course runs from 9am to 5pm, Oct 26-27
  - Lunch is 12-1 both days
  - Ten minute break mid morning and mid afternoon
- Materials are located here
  - https://github.com/ExgnosisClasses/2602-GenAI-Oct26
  - This repository will be available until November 27, 2026
- Virtual Machines
  - You will be assigned your own VM at the start of the first lab
  - They are available continuously until the end of the class
  - The VMs are provisioned with an OpenAI API key that expires at the end of the class

Instructor – Rod Davison

- 50+ years experience in IT
- 40+ years experience in AI
- Designed and developed AI prototypes
  - NLU, expert systems, machine translation, agents and more
  - Research director for AI companies
- Academic background
  - Theoretical math, psychology, anthropology, cognitive science
- Consulting
  - Finance, Defence, Insurance, Government, Fortune 100
- Currently doing research in emerging AI technologies

What to Expect

- The course covers the following topics
  - 1. GenAI Foundations for Java Developers
  - 2. Interacting with LLMs
  - 3. Prompt Engineering as Software Development
  - 4. Testing and Evaluating LLM Features
  - 5. Compliance, Guardrails and Fine-Tuning
  - 6. Observability and QA in Production
  - 7. Agents
- All of the lab work is done in Java

What to Expect

- The course is only two days in length
  - Each of the topics covered could easily be a week long course
- That means:
  - We can only provide a high level overview of these topics
  - Think of it as a starting point for you own deeper dives in to the topics
  - There is a lot to cover in a very short period of time
- Timeliness
  - The current state of the art in AI is chaotic with rapid shifts and changes
  - The material in this class will become dated within months
  - Not just technologically but from a compliance/regulatory perspective and the social acceptance aspect

Introductions

- In order for me to ensure the class meets your needs
- Please introduce yourself and tell me:
  - Your professional background so I have a sense of what skill sets you are bringing to class
  - Your experience, if any, using AI and GAI
  - Any specific goals or objectives for the class
